**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-18 are rejected under 35 U.S.C. 102(e) as being anticipated by Juds, USPN 6,564,997.

Juds discloses a bill acceptor mechanism for a gaming machine. The mechanism has all of the well known components the Applicant is claim which are used to accept or reject currency, see Juds figures and the beginning portion of the specification. As an aside to the main feature of the disclosed invention which is directed to an electronic security key, Juds discloses in the latter portion of the specification that it has a simple up and down counter to determine if an acceptance rate falls below a threshold value, e.g. 66.6%. If the acceptance rate is below the threshold value, an LED "tilt" illuminator is activated. This illuminator is located so as not to inform the user of its
